

HRS PAY

HRS Pay is an API-first spend management and automation platform for B2B travel expenses.

Our pay engine automates more than 90% of the book to VAT reclaim workflow.

For any payment input like hotel, meeting rooms booking or on the go payment-, HRS takes care of Virtual credit card generation, invoice collection, digitization, correction and payment.

Invoice data are itemized and consolidated with bank transactions and, with a plug-and-play approach, directly imported into any expense management tool, VAT reclaim tool, procurement analysis tool, ERP system, HRS proprietary tool or any other third-party software.

HRS PAY IS THE RIGHT FIT FOR

HRS Pay is the optimal solution for large corporates with wide volumes of business travels. It simplifies the traveler book to expense experience, helps travel managers improving program adoption, feeds procurement with rich data for spend analysis, removes low value manual tasks from finance teams and maximize savings.

HRS STRONGER DIFFERENTIATORS

95%  Most accurate invoice data

The only one dealing with complex invoice validation – HRS AI can easily deal with booking-invoice-transaction validation for complex invoices such as meeting and groups invoices.

We also cover in-destination expenses – Via our On-the-go payment app, we provide corporates with employees virtual cards, smart budgets, customizable policy payment rules and expense submission automation.

OUR 3RD PARTY INTEGRATIONS

Our Pay platform is agnostic and interoperable and can easily adapt to our client's tech ecosystem. We are currently integrated with major banks, card issuers, VAT services, and expense management tools.
